EXCEL – DATA EXPLORATION

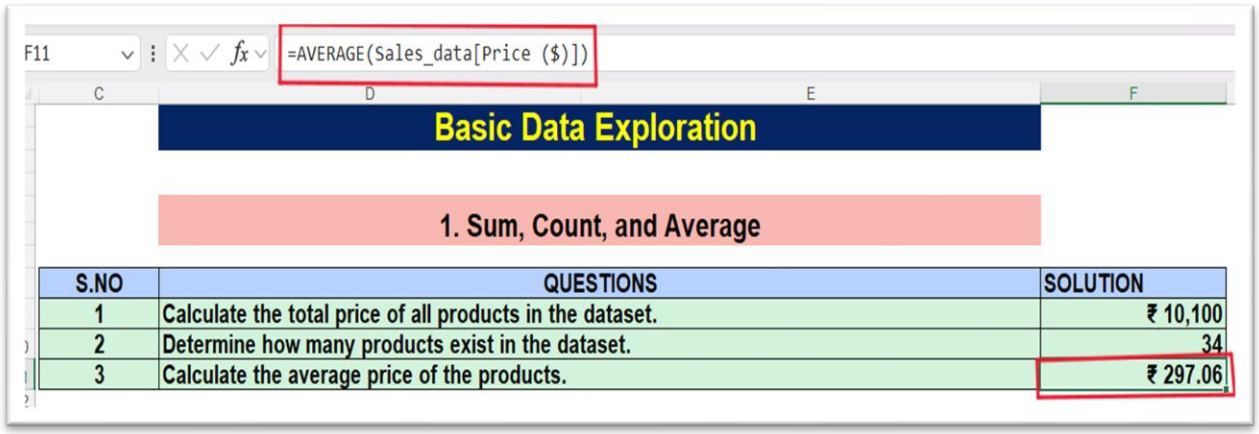

Basic Data Calculations - (SUM, COUNT, AVERAGE)

S.NO	QUESTIONS	SOLUTION
1	Calculate the total price of all products in the dataset.	₹ 10,100
2	Determine how many products exist in the dataset.	34
3	Calculate the average price of the products.	₹ 297.06

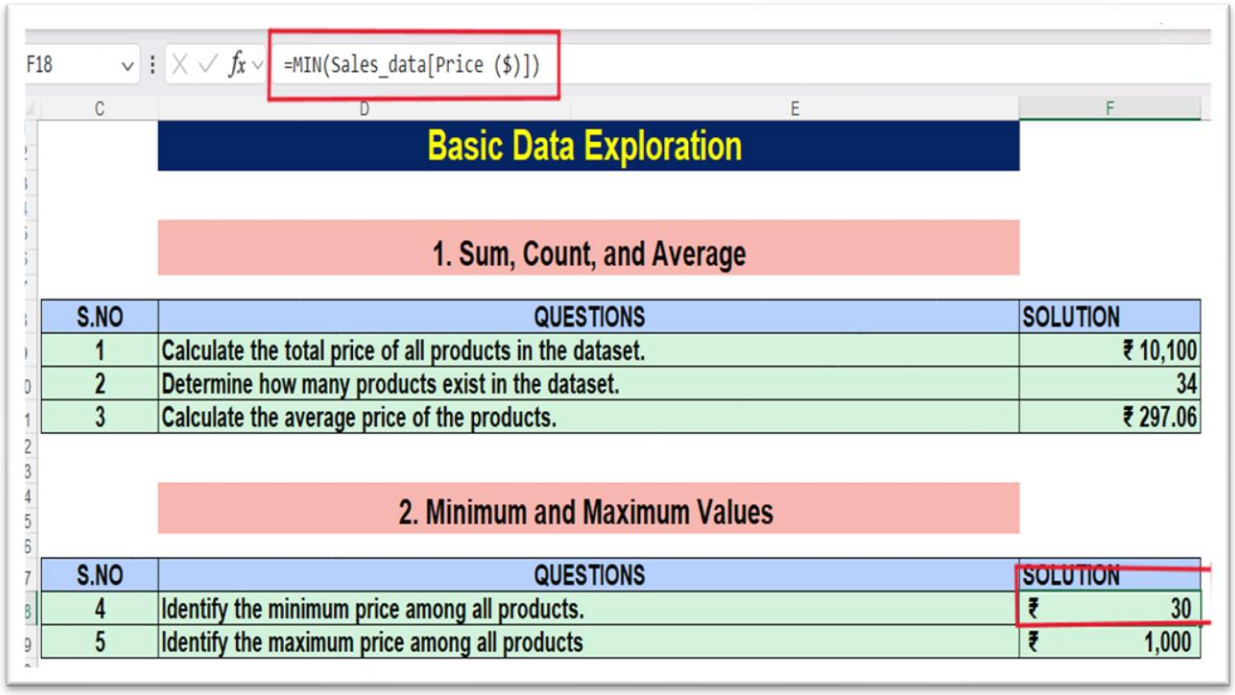

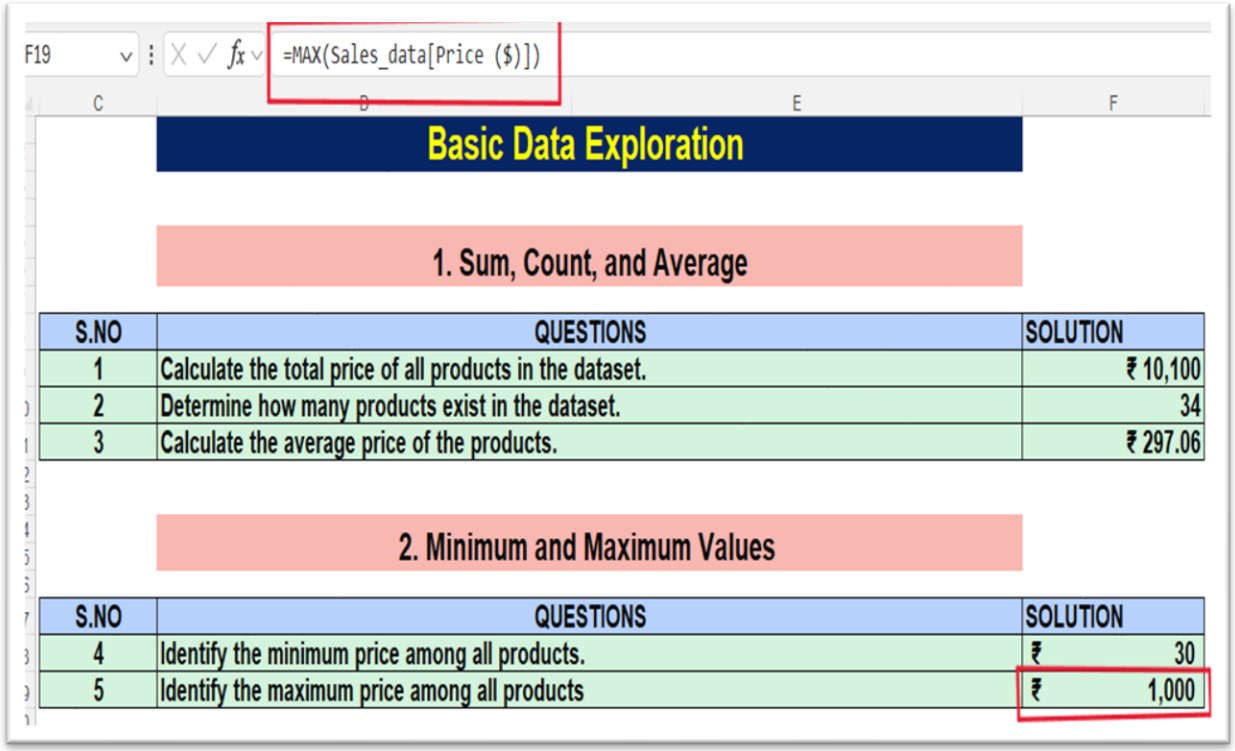

S.NO	QUESTIONS	SOLUTION
1	Calculate the total price of all products in the dataset.	₹ 10,100
2	Determine how many products exist in the dataset.	34
3	Calculate the average price of the products.	₹ 297.06

S.NO	QUESTIONS	SOLUTION
1	Calculate the total price of all products in the dataset.	₹ 10,100
2	Determine how many products exist in the dataset.	34
3	Calculate the average price of the products.	₹ 297.06

Minimum and Maximum Price Analysis - (MIN, MAX)

Product Price Categorization

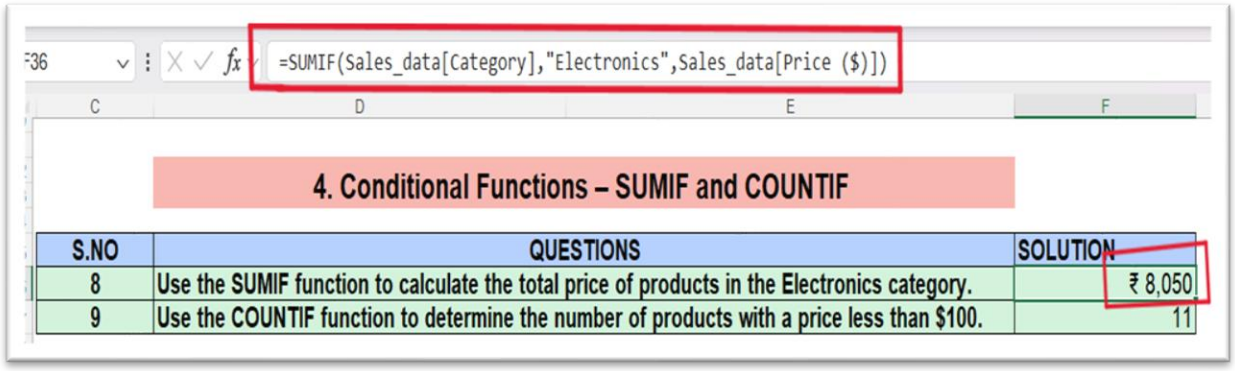

(IF Function and creation of new column " Price Range)

=IF(Sales_data[Price ($)]>=500, "High price","Standard Price")

Product Name	Brand Name	Price ($)	Price Range	Quantity
Laptop	Dell	1000	High price	30
Sneakers	Nike	80	Standard Price	15
Coffee Maker	Keurig	130	Standard Price	40
Smartphone	Samsung	900	High price	25
Backpack	North Face	70	Standard Price	20
Headphones	Sony	200	Standard Price	45
T-shirt	Adidas	30	Standard Price	5
Blender	Ninja	90	Standard Price	35
Tablet	Apple	500	High price	50
Hiking Boots	Timberland	130	Standard Price	10
Laptop	HP	950	High price	25
Sneakers	Adidas	90	Standard Price	40

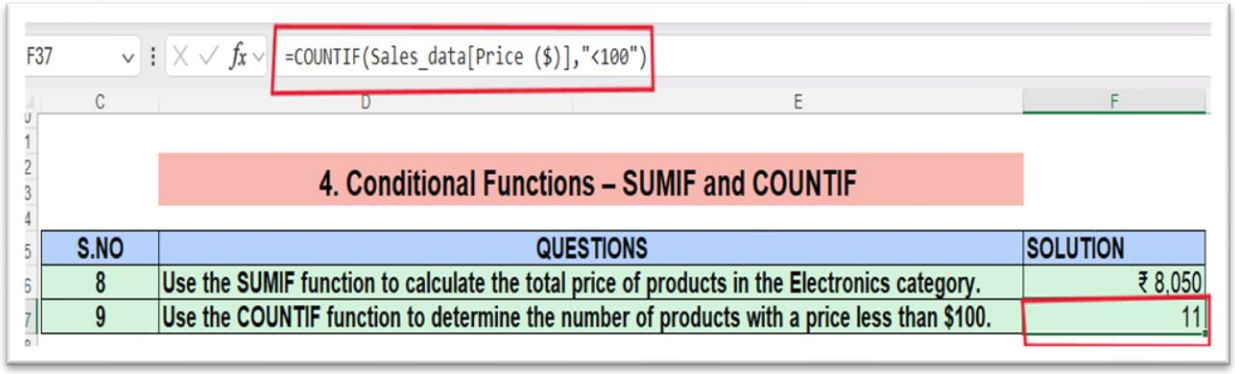

Conditional Data Analysis - (SUMIF, COUNTIF)

=SUMIF(Sales_data[Category],"Electronics",Sales_data[Price ($)])

4. Conditional Functions – SUMIF and COUNTIF

S.NO	QUESTIONS	SOLUTION
8	Use the SUMIF function to calculate the total price of products in the Electronics category.	₹ 8,050
9	Use the COUNTIF function to determine the number of products with a price less than $100.	11

=COUNTIF(Sales_data[Price ($)],"<100")

4. Conditional Functions – SUMIF and COUNTIF

S.NO	QUESTIONS	SOLUTION
8	Use the SUMIF function to calculate the total price of products in the Electronics category.	₹ 8,050
9	Use the COUNTIF function to determine the number of products with a price less than $100.	11

Product ID Text Extraction -(LEFT, RIGHT, MID)

Creation of new column "DAY" and LEFT function

=LEFT(Sales_data[Product ID],2)

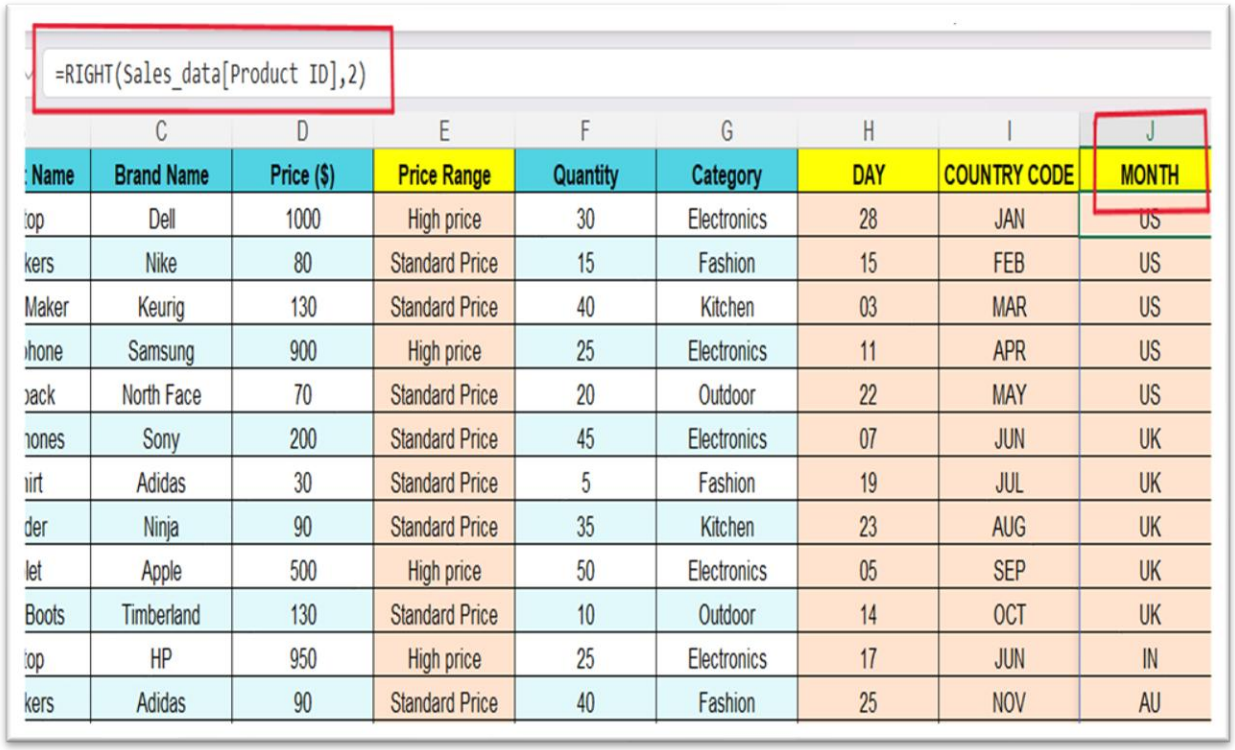

Product Name	Brand Name	Price ($)	Price Range	Quantity	Category	DAY
Laptop	Dell	1000	High price	30	Electronics	28
Sneakers	Nike	80	Standard Price	15	Fashion	15
Coffee Maker	Keurig	130	Standard Price	40	Kitchen	03
Smartphone	Samsung	900	High price	25	Electronics	11
Backpack	North Face	70	Standard Price	20	Outdoor	22
Headphones	Sony	200	Standard Price	45	Electronics	07
T-shirt	Adidas	30	Standard Price	5	Fashion	19
Blender	Ninja	90	Standard Price	35	Kitchen	23
Tablet	Apple	500	High price	50	Electronics	05
Hiking Boots	Timberland	130	Standard Price	10	Outdoor	14

Creation of new column "COUNTRY CODE" and MID function

=MID(Sales_data[Product ID],4,3)

Name	Brand Name	Price ($)	Price Range	Quantity	Category	DAY	COUNTRY CODE
top	Dell	1000	High price	30	Electronics	28	JAN
kers	Nike	80	Standard Price	15	Fashion	15	FEB
Maker	Keurig	130	Standard Price	40	Kitchen	03	MAR
hone	Samsung	900	High price	25	Electronics	11	APR
ack	North Face	70	Standard Price	20	Outdoor	22	MAY
nones	Sony	200	Standard Price	45	Electronics	07	JUN
irt	Adidas	30	Standard Price	5	Fashion	19	JUL
der	Ninja	90	Standard Price	35	Kitchen	23	AUG
let	Apple	500	High price	50	Electronics	05	SEP
Boots	Timberland	130	Standard Price	10	Outdoor	14	OCT
top	HP	950	High price	25	Electronics	17	JUN
kers	Adidas	90	Standard Price	40	Fashion	25	NOV

Creation of new column "MONTH" and RIGHT function

=RIGHT(Sales_data[Product ID],2)

	C	D	E	F	G	H	I	J
Name	Brand Name	Price ($)	Price Range	Quantity	Category	DAY	COUNTRY CODE	MONTH
top	Dell	1000	High price	30	Electronics	28	JAN	US
kers	Nike	80	Standard Price	15	Fashion	15	FEB	US
Maker	Keurig	130	Standard Price	40	Kitchen	03	MAR	US
hone	Samsung	900	High price	25	Electronics	11	APR	US
ack	North Face	70	Standard Price	20	Outdoor	22	MAY	US
hones	Sony	200	Standard Price	45	Electronics	07	JUN	UK
irt	Adidas	30	Standard Price	5	Fashion	19	JUL	UK
der	Ninja	90	Standard Price	35	Kitchen	23	AUG	UK
let	Apple	500	High price	50	Electronics	05	SEP	UK
Boots	Timberland	130	Standard Price	10	Outdoor	14	OCT	UK
top	HP	950	High price	25	Electronics	17	JUN	IN
kers	Adidas	90	Standard Price	40	Fashion	25	NOV	AU

CONCLUSION

This project includes basic data exploration and analysis of a product dataset using Microsoft Excel. It covers data calculations using SUM, COUNT, AVERAGE, MIN, and MAX; price categorization using IF; conditional analysis using SUMIF and COUNTIF; and text extraction from Product IDs using LEFT, RIGHT, and MID.
